

# VisCube C4-T3™

## CAVE Immersive 3D Display

The **VisCube C4-T3™** is a **high resolution** CAVE immersive virtual reality system. It features rear-projection walls and a front projected floor. The 12' wide front wall and floor allow more viewers in the space than a standard 10' wide CAVE configuration. The VisCube C4-T3 is configured as a turn-key immersive virtual reality system, complete with a tracking system and graphics workstation. See datasheet below.

The VisCube C4-T3 can be installed in existing spaces. **The system fits within standard office 9' ceiling heights.** This eliminates time-consuming and costly room modifications.

The VisCube provides a high level of immersion using multiple life-size 3D display surfaces surrounding the user. With the addition of head tracking, virtual objects appear at human scale and users can manipulate their perspective with natural head movements. This ability to look in, out, and around virtual objects enhances the ability to visualize many types of data.
