## CAVE Immersive 3D Display

The **VisCube M5™** is a **low cost, high performance** front projected CAVE immersive virtual reality system. **The VisCube M5 adds a back wall to the M4 for 360 immersion and a door for egress.** The VisCube M5-W is a turn-key immersive virtual reality system, complete with a tracking system and graphics workstation.

**The VisCube M5 is ultra compact.** It can be installed in very small spaces. The **VisCube M5** makes use of high quality ultra-short throw optics. The result is excellent image quality. Users do not cast a shadow until they are within an arm's length from the screen. Getting any closer is not very useful, the system provides the same experience as rear projection.
